Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Diane Novak

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The internet was created by the U.S. government at taxpayer expense, just like the "public airwaves". The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Please do not allow the wealthiest of corporate interests set up a Pay to Play system where they profit handsomely and the rest of us pay dearly. Let's be democratic and fair.

Thank you for doing the right thing for ALL the people.

Sincerely,
Mr. David Stirling

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mrs. Alexandra Lovell

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Christie Rosenberg

Dear Commissioner Wheeler,

Imagine if Gutenberg destroyed his plans for the printing press. Someone eventually would have re-invented it but his action would have reverberated for centuries. This is very similar to the position in history that you now occupy, as the Internet is the greatest technological innovation in at least 500 years. How you rule will affect it drastically, and will be remembered for centuries. Don't place yourselves on the wrong side of that history.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. Just as the phone company cannot decide to charge more for completing calls to specific numbers, the ISPs should not be allowed to discriminate in charges for internet access. Represent the citizens of the US not the wealthy corporate interests.

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Frank Hensley

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Dr. Bruce Stubbs Ph.D.

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

Dear Mr. Wheeler,

Please take this crucial opportunity to convey to the public citizens, who are your true employers, that you understand and support the fact that the Internet is an essential public good. If this plain, straightforward statement is not enough, please read further.

As our vast geographic and resource rich country has advanced over the past 250 years, milestones of civic development have marked progress in national security, health, education, creativity and enterprise. A deep and sustained national commitment to the common good revealed through government-sponsored programs such as New Deal era WPA public works projects, the Tennessee Valley Authority Power project and Eisenhower's Federal-Aid Highway Act of 1956 made possible every advantage the United States has held since before the Second World War. These developments have benefitted ordinary Americans while fueling the engines of global economic power, and they continue to pay dividends into the 21st Century.

The Internet is a further instantiation of American ingenuity and advancement, and it is on a scale unimaginable to Roosevelt or Eisenhower. Though its technological prowess exceeds these earlier endeavors, it is no less a public good than supplying electricity to rural Georgia in the 1930's, which served to electrify school houses and homes connecting them to the larger and wider community of which they were a political and economic part.

Following and sustaining this historic American story, the Internet MUST remain equally accessible to ALL in America for the good of each and all. Undermining current net neutrality standards and allowing monopoly wireless corporations to divert and slow certain content delivered to its customers is akin to rationing electricity to those who could not pay top dollar in the 1930's or inserting a coin operated delivery system for hot water in American homes today. There are and must be certain elements of national infrastructure which always remain beyond the reach of corporate grasp. The Internet is for all meaningful intents and purposes the 21st Century's national highway and must be allowed to benefit all in America regardless of their social, political or economic clout.

I implore you to support and sustain net neutrality today and in the future.

Kayte Fulton, Denver, CO

Sincerely,
Ms. Kayte Fulton

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

The Internet is also the birthplace of new ideas and ways of sharing innovation and creating new jobs. By segregating internet users, you will be squashing communication which is a huge mistake. If the USA is to continue to be a great nation, we should aim to encourage digital media and communication. We are still at least 5-10 years behind Europe in this regard. Don't cast us back to the stone age by allowing big money tell you what do and how to vote. It's time to man (or woman) up and stick up for your voting public. If you don't, you will kill small business, kill innovation, and most of all ruin our chances to compete in a global market. Don't be the one who ruins America for the promise of a few thousand dollars in campaign contributions from big corporations.

The other day, my local radio station played an announcement that Mexico is working to have free WIFI in public places. This is the right direction! While I'm stunned we didn't think of it before, we should do this ASAP. What better way to encourage communication than this? I truly can't think of anything.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,

Could you imagine a postal system in which junk mail is treated with more speed and consideration than just, say, a letter from me to you? The postal system is becoming outdated, but the precepts of fairness and equality on which this country was founded are still important. I'm certain that those interests, businesses with a concern for large profits will be trying to persuade you to make the internet more readily available to them. Please don't.

Thank you for your time.

Sincerely,
Mr. Mo Oliver

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our twenty-first-century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Patricia Boyd

Why is everything always for sale? The internet belongs to all the world's people. Next thing you know air will be for sale to those who can afford the best of it. We the people of the United States and of the world demand and insist that the world wide web is for everyone and NOT for those who can afford the best of everything.

It is NOT for sale and control by the government or anybody else. It belongs to us all. Maybe rich folks and corporations should be taxed to use the public internet. I would support ideas in that direction.

Sincerely,
Mr. Richard Hardin

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Irma Albinana

Petition Mailbox
DC 20036

Subject: Protect Democracy, Protect Internet Access!

Dear Commissioner Wheeler,

Without equal and fair access to information on the internet,
democracy cannot survive.

I am a Community College Teacher; I rely on a wide variety of internet
sources for
my class material. I am gravely concerned that the smaller internet
ventures--
some of the most truly innovative, and those that do researched
investigative journalism-- will be squashed if large communication
companies
are allowed to create "fast lanes".

Large corporate entities should not have the right to determine who has

the right to "speak" on the internet, and by creating a
tiered system of internet speeds,
this is exactly what will happen. Everyone knows that pushing
publicly shared information to the slow lanes will in effect re-direct
traffic
to the fast lanes of large communication companies whose motive is
profit oriented
rather than information sharing.

The Internet is our 21st century public square. We use it to inform
ourselves about candidates, debate the issues, and organize with other
advocates. The Internet's role as a vibrant platform for public
discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm
all of us. Corporate voices will always be able to afford special
access while independent and non-profit voices suffer. The FCC must
reject any plan that would allow corporate gatekeepers to control web
traffic and recommit to the Open Internet by reclassifying broadband as
a utility.

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Dave Beckett

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Christine Mandell

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

The problem I see with allowing faster and slower "tiered services" is this. Most broadband carriers are also trying to sell content. If they can relegate their competition to slower lanes, or force their competition to pay higher fees, the market for Internet content will be skewed in a way that market forces will not be able to correct.

If law demanded that carriers not be or own content providers, this would not be such an issue, however, that is not currently the case.

Comcast would rather have its customers watch Comcast Sports Center than ESPN. Verizon would rather have its customers watch Verizon on-demand content than Netflix. I already pay my ISP a premium for higher speed. If the carrier is allowed to slow down content that I want to see, but that is sold by a competitor, then they are actually violating their agreement with me for high speed.

Please do not allow this to happen. Arguments that it is necessary for a newer more modern Internet are purely specious. Build the newer more modern Internet and let each customer (content provider and consumer) pay for the traffic they use.

Thank you.

Sincerely,
Mr. Paul Kagan

The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Beyond this, it's imperative that the FCC denote Common Carrier status upon the internet infrastructure in the USA. Short of this reclassification, huge ISPs will continue to erode the edges of laws which require them to treat all internet traffic equally and fairly.

Sincerely,
Mr. Troy Porter

Dear Commissioner Wheeler,

Have we not learned our lesson yet?! Do we not understand that the cable companies wouldn't be spending all this money to lobby for this change if it were not hugely profitable for them?

This is nothing but another avenue for them to increase their profits at the detriment of their customers and the internet at large.

Goodbye having any true uncensored or free information available on the internet. The only ones with a voice will be those with deep enough pockets to pay for the bandwidth.

The public has never had the opportunity to be more informed than it is today. It is because the truth is key strokes away. Net neutrality will keep it that way. Its removal will allow those with deep pockets to once again deliver only the content they choose.

What a horrible decision it would be to change this, Anti-Freedom, Anti-Choice and Anti-American!

I doubt the FCC cares though as other recent changes they allowed like allowing the cable companies to broadcast encrypted basic cable has already increased my bill \$40 a month. I sure hope whoever is profiting from this is enjoying their new boat! Meanwhile I have to figure out what else to trim from my families budget to be able to watch basic local channels.

Thanks FCC for looking out for American Families.....NOT

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Jon Reid

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Net neutrality is the First Amendment of the Internet, the principle that Internet service providers (ISPs) treat all data equally. As an Internet user, net neutrality is vitally important to me. The FCC should use its Title II authority to protect it. Most Americans have only one choice for truly high speed Internet: their local cable company. This is a political failure, and it is an embarrassment. America deserves competition and choice. Without net neutrality, a bad situation gets even worse. These ISPs will now be able to manipulate our Internet experience by speeding up some services and slowing down others. That kills choice, diversity, and quality. It also causes tremendous economic harm. If ISPs can speed up favored services and slow others, new businesses will no longer be able to rely on a level playing field. When ISPs can slow your site and destroy your business at will, how can any startup attract investors? My friends, family, and I use the Internet for conversation and fun, but also for work and business. When you let ISPs mess with our Internet experience, you are attacking our social lives, our entertainment, and our economic well being. We won't stand for it. ISPs are opposing Title II so that they can destroy the FCC's net neutrality rules in court. This is the same trick they pulled last time. Please, let's not be fooled again. Title II is the strong, legally sound way to enforce net neutrality. Use it.

Sincerely,
Mr. D Mitchell Freeman

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. It is a now necessary instrument for informing and communication. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Gillian Van Der Vlugt

Subject: Protect Internet Freedom for All, Not Just Those Who Can Pay More!

Dear Commissioner Wheeler,

The Internet is our 21st century public square and we, the public care about making sure that the Internet stays open to everyone, and is overwhelmingly opposed to the current FCC plan to allow Big Telecom to charge websites to allow them to load faster.

We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Despite all of this outcry, FCC Chairman Tom Wheeler is still siding with Big Telecom and ignoring the will of the public. Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Please don't allow the carving of the internet into fast and slow lanes
- benefiting only the rich and mighty.

Sincerely,
Mrs. Elisabeth Williford

When will our government begin working for people and not the corporations? When will the FCC stop being a tool of the moneyed interests? Take the correct ethical stand now. Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Michael Carano

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

When will our government begin working for people and not the corporations? When will the FCC stop being a tool of the moneyed interests? Take the correct ethical stand now. Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Michael Carano

Big business has a history of breaking promises to the public and negating anything of value to the public (remember how cable companies promised public would not have to view advertisements if they saw TV through their paid cable service....and we know how that has turned out) by eventually making it too expensive for the public or in some way abusing it for their own profit interests.

The Internet should be kept free, or minimal cost, so the public can use it without it's use being distorted by big business.....which is what it is trying to do.

PLEASE DO NOT LET BIG BUSINESS MESS AROUND WITH, OR CONTROL THE INTERNET IN ANY WAY.

Sincerely,
Mr. Kundan Mehta

Subject: Protect Internet freedom!

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
David Peters

Dear Commissioner Wheeler,

Because of "(rich) Citizens United" and any number of other breaches of my freedom and our (so-called) democracy, not even my vote really counts. Elections have been purchased. Mr. Nestle says I don't have any right to free water and it should be privatized. If you take away my free internet, nothing is left but the air. Can't you stand up for ONE little right for the masses? It won't hurt you. C'mon!

Consider the school children who now use the internet for their school projects and reports. Consider the poor. Have a heart. (What's the chance of that?)

Yes, I guess you're right. I am angry.

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Dear Commissioner Wheeler,

Freedom of the press and speech is as necessary for a democracy as is voting to elect our representatives. The internet is the most important provider of press and speech worldwide today. NET NEUTRALITY is the basis of all people having to right to express their ideas and to be heard by all, with equal platforms.

DO NOT let an oligopoly of communication corporations limit free speech and press.

Pass a permanent regulation to stop repeated attempts by Team Cable to close the Open Internet by reclassifying broadband as a utility.

Sincerely,
Ms. Nancy Pratt

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. Already, large corporations control and filter the flow of information through every other form of media. Providing poor service to Internet-based information providers- or even to small startups without the means to buy the same quality of service their larger competitors have- will not only stifle the last remaining truly free press, it will stifle the future Apples, IBMs, and Microsofts of America.

The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,

Dear Commissioner Wheeler,

The Internet is our 21st century public square. We use it to inform ourselves about candidates, debate the issues, and organize with other advocates. The Internet's role as a vibrant platform for public discourse is vital to our democracy.

Letting well-financed interests build fast lanes for the few will harm all of us. Corporate voices will always be able to afford special access while independent and non-profit voices suffer. The FCC must reject any plan that would allow corporate gatekeepers to control web traffic and recommit to the Open Internet by reclassifying broadband as a utility.

Sincerely,
Mr. Martin Kluksdal
